

### Short Curriculum Vitae Roberta Bettinetti

Current position Associate Professor BIO 07 Ecology (2015) (Comparative Assessment, 21.11.2014, 05/C1). Duties: Research and Lectures (4 courses in environmental field within the master degree of Environmental Sciences and one course in Humanities Science) Qualification to Full Professor BIO07 (8/10/2018 art. 16 paragraph 1, Law 240/10); positive votes 5/5.

Until 31 October 2021 Vice Director of Department of Human and Innovation for the Territory;

Director of the Specialization School of REACH, Registration, Evaluation, Authorization and Restriction of Chemicals, third level of instruction at the University of Insubria.

Research interests Ecology applied to the study of environmental contamination (both legacy and emergent contaminants) with special reference to aquatic environments (both freshwater and marine); study of the trophic relationships between different organisms of aquatic ecosystems; studies on biodiversity management setting up methodologies to ensure the effectiveness of conservation activities and ecological sustainability; particular interest in comparison of different environmental realities (at a national and international levels) using a risk assessment approach (mainly through the use of ecotoxicity tests). Particular interest for remote areas (high mountain lakes, saline lakes in Africa) and effects of climatic changes on biota. The research group is composed by young fellows, starting from several master thesis and three PhD students up to a post-doc. Each researcher in the group is mainly specialized in different aspects of the ecotoxicology field, some more on freshwater studies, while others on marine one. Moreover, former PhD students are still collaborating with the team, therefore multiple research are still carried out with this precious experience.
